

Need more from your data stack?

Turbo charge your data with our Quick Start solution.

With the combined power of RUBIX, Snowflake, & DBT our rapid solution is highly scalable, on demand and can be setup in minutes.

Designing the framework to warehouse a growing amount of information can be difficult, time consuming and expensive. Relocating your data to a cloud data warehouse should simplify workloads and centralise disparate data, enabling your business to become more data driven and efficient.

How we turbo charge your data stack?

What our Quick Start Solution means for your business

Our Quick Start solution rapidly implements the right data stack to eliminate silos in your organisation and gets you data driven, with actionable insights, safely, securely and in just minutes. Your development teams can quickly onboard the data and start delivering in no time, even as a group.

All our tools are opensource so there is no licence fee*

Why trust RUBIX with your data?

RUBIX are the experts in implementing scalable, repeatable and cost effective data solutions. Benefit from our partnerships with the world's best data software technologies to get ahead of the dcompetition. Trusted by Australia's leading brands and Government bodies, we know data backwards.
